

Mintzer Mobile App — UI Design Brief

Document version: 1.1

Date: June 2026

Platform: Android (primary), iOS (future)

Languages: English + Hindi (v1)

Audience: UI/UX designer, Figma handoff

Product: Mintzer — earn through card deals (Flipkart, Amazon, etc.)

How to use this doc: States **what** each page must include and **how it behaves**. Visual style is designer's call.

Detailed orders spec: [ORDERS-PAGES-REQUIREMENTS.md](#).

1. Product summary

Mintzer helps users earn money by placing orders on e-commerce sites (Flipkart, etc.) using specific credit cards, delivering to Mintzer-provided addresses, and completing verification steps in the app.

Core user journey:

Login (phone) → Browse deals → Read deal detail → Accept deal → Place order on Flipkart within timer → Confirm Order ID → My Orders (tracking → delivery OTP → invoice) → Wallet payment.

Key product rules for design:

- Login: phone + OTP only — no profile at signup.
- Flow: **Home** → **Deal detail** → **Accept** (Option B — read before commit).
- Only **one active “place order” timer** at a time until Order ID or screenshot submitted.
- Timer duration set by backend (show countdown, not fixed “15 min” in designs).
- User selects **delivery partner** + pastes tracking ID (no live API tracking in v1; courier list from samples/client).
- Invoice upload unlocked only after ops marks parcel received (backend).
- 48-hour payment countdown starts after invoice upload.
- **v1 orders:** Regular only (no Instant tab).
- **KYC:** Name + PAN on **first Accept**; required before first order.
- **Withdraw:** Full flow in v1.

- **Languages:** English + Hindi.

2. Design principles

Principle	Direction
Feel	Fluid like RedBus — fast, clear, trustworthy
Theme	Light only for v1
Colors	Google Material — not purple AI gradients, not dark/gold competitor look
Density	One primary action per screen; paste-friendly inputs on order steps
Trust	Show exact ₹ figures on deal detail — no vague “Earn” without breakdown
Logos	Fixed-size containers — never stretched store/bank logos

3. Design system

3.1 Color palette

Token	Hex	Usage
Primary	#1A73E8	Buttons, links, active nav, progress
Primary dark	#1557B0	Button pressed
Surface	#FFFFFF	Cards, sheets
Background	#F8F9FA	Screen background
Text primary	#202124	Headings, amounts
Text secondary	#5F6368	Captions, hints
Earn / success	#188038	You earn, commission, checkmarks
Warning	#F9AB00	Timer low, alerts
Error	#D93025	Errors, TDS line, cancel confirm
Divider	#E8EAED	Card borders, lines
Active placement strip	#E8F0FE bg + #1A73E8 text	Timer banner on Home
Commission bar	#1A73E8 (primary blue)	My Orders card footer — locked (see \$12)

3.2 Typography

Style	Size	Weight	Use
Display / hero ₹	28–32sp	Bold	You earn, wallet balance
Title	20–22sp	SemiBold	Screen titles

Section label	12sp	Medium, uppercase optional	YOU PAY, CASHBACK
Body	14–16sp	Regular	Rules, notes
Caption	12sp	Regular	Billing cycle, hints
Money row	16sp	Medium	Line items in money card
Button	16sp	SemiBold	CTAs

Font: Roboto or Google Sans (Material default).

3.3 Spacing & shape

- Screen horizontal padding: **16dp**
- Card padding: **16dp**
- Card corner radius: **12dp**
- Button height: **48dp**; corner **24dp** (pill) or **8dp**
- Bottom nav height: **56dp** + safe area
- FAB: **56dp**, bottom-right above nav (**16dp** margin)
- Min tap target: **48×48dp**

3.4 Icons

- Material Icons Outlined
- Header: wallet, notifications, share, back, copy, paste
- Nav: home, shopping_bag/orders, percent/offers, person/profile
- Support FAB: chat or WhatsApp-style

3.5 Motion

- Screen transitions: **300ms** ease
- Success checkmark: subtle scale-in
- Timer last 2 min: optional gentle pulse on countdown (not flashing red)
- Skeleton loaders on lists — no full-screen spinners

3.6 Localization

- **v1 languages:** English (default) + Hindi.
- Design all screens with **~30% longer Hindi strings** in mind (buttons, labels).
- Provide Figma text styles for both; key strings duplicated as component variants or separate frames.
- Language switcher: Profile row **Language** → English | हिंदी (persists in app).
- Numbers and ₹ stay LTR; dates localized later.

4. User flows

4.1 Primary flow

```

Login → Home → Deal detail → Accept deal
  → [External: Flipkart order]
  → Submit Order ID / screenshot
  → Order placed success → My Orders
  → Tracking ID → Out for delivery (last 4 + OTP)

```

→ [Wait: parcel received – ops]
→ Upload invoice → 48h timer → Wallet credited

4.2 Placement rules

- User taps **Accept deal** on Deal detail → timer starts on **Accept screen**.
- While timer active: Home shows **active order strip**; other deals **dimmed** — “Finish current order first”.
- **Cancel order** on Accept → frees slot.
- Timer expires without confirm → no My Orders entry; push to re-engage.

4.3 Navigation structure

Bottom tabs (always visible on main app):

Tab	Root screen
Home	Deal list
Orders	My Orders
Offers	Promotions
Profile	Settings

Stack screens (push over tabs):

Deal detail → Accept → Order success

KYC sheet (modal)

Withdraw (future)

5. Global components

Design these once in Figma as components:

Component	Variants
Primary button	Default, disabled, loading
Secondary / outline button	Cancel, Browse deals
Deal card (Home)	Default, disabled/blocked
Active placement banner	With countdown
Logo row	Store 40×40, Bank 32×32, contain
Money summary card	Full (deal detail), compact (accept)
Paste text field	+ Paste chip button
Order progress bar	6 steps: placed → shipped → OFD → delivered → invoice → payment
Order card	Collapsed, expanded per step
Countdown timer	Accept (mm:ss), Payment (hh:mm:ss)

Bottom nav bar	4 tabs, active state
Support FAB	Blue circle, chat icon
Empty state	Illustration + CTA
Skeleton	Deal list, order list
Snackbar / toast	Copied, error, success
Confirm dialog	Cancel order, Log out
Collapsible section	Offer details, Links, How wallet calculated

6. Screen specifications

PAGE 1 — Login (Phone)

Purpose: Enter app with phone only.

Layout:

Zone	Content
Top	Mintzer logo centered
Middle	Headline: "Enter mobile number"
Input	Country +91 + 10-digit phone field
CTA	Continue (disabled until 10 digits)
Footer	Terms · Privacy links (small)

OTP sub-screen (same flow):

Zone	Content
Title	"Verify OTP"
Subtitle	"Sent to +91 XXXXX X4321"
Input	4–6 OTP boxes
Link	Resend OTP (with countdown)
CTA	Verify

Do not include: Name, email, KYC, referral.

States: Invalid phone error, wrong OTP, loading on button.

PAGE 2 — Home

Purpose: Browse deals; resume active placement.

Layout (top → bottom):

#	Element
1	Header: Mintzer logo left · WhatsApp + YouTube icons · Wallet ₹ · Notifications bell
2	Search bar: “Search deals...” + filter icon
3	Active placement strip (conditional): “iQOO Z10 — 12:34 left · Tap to continue →”
4	Promo banner carousel (optional): signup bonus or YouTube — copy flexible; blue/white
5	Deal list (vertical scroll)
6	Support FAB (bottom right)
7	Bottom nav — Home selected

Deal card (each row):

Element	Spec
Product image	Left, ~80dp, fixed frame
Title	Product name, 2 lines max
Store logo + name	Small Logo row
Card chip	“Axis Credit Card” / “Any card”
Order price	“₹20,000”
Earn	“Earn ₹300” green
Button	Earn ₹300 full width on card OR whole card tappable

Blocked deal variant: 50% opacity + text “Finish current order first”.

States: Loading skeleton, empty “No deals”, error + retry.

Tap: Card → **Deal detail** (not Accept directly).

PAGE 3 — Deal detail

Purpose: Read full deal and money breakdown; tap Accept.

Layout (scroll + sticky footer):

#	Element
Header	Back · “Deal details” · Share (optional)
Hero	Product image — fixed frame, contain
Meta	Name · Color · Variant · Qty
Store row	[Logo 40dp] Flipkart

Card row	[Logo 32dp] Card to use · Axis Credit Card
Money summary card	See Section 7
Rules	Up to 3 bullet points (coupon, colour, card warning)
Accordion	Offer details (TDS, timing)
Accordion	Links — URL + Copy + Open
Accordion	How to use — YouTube
Sticky footer	Accept deal primary button

Do not include: Timer, delivery address, Order ID, Cancel.

Dialog: If active placement exists — “Finish current order first” + Go to Accept.

PAGE 4 — Accept / Place order

Purpose: Timer running; user orders on Flipkart and confirms.

Layout:

#	Element
Header	Back (warn if leaving) · “Place your order”
Timer	Large mm:ss — hero; amber when < 2 min
Summary	Product name · color · store · card chip
Compact money	You pay ₹20,200 · You earn ₹300
Actions	Copy address · Copy pin (side by side)
CTA	Open Flipkart (primary outline or filled)
Accordion	Offer details (optional)
Input	Order ID — wide field + Paste chip
Upload	Upload screenshot secondary
Footer	Submit order primary
Footer	Cancel order outline/red — confirm dialog

KYC sheet (first Accept only): Modal on Accept — “Complete KYC to continue” → KYC form (Name + PAN only).

States:

State	Design
Running	Normal
Submitting	Button loading

Expired	Full message "Time's up" + Browse deals
Cancelled	Return Home

Success navigates to: Order placed success.

PAGE 5 — Order placed success

Purpose: Confirmation moment.

Layout (centered):

Element	Content
Animation	Green checkmark
Title	Order placed!
Subtitle	"₹300 commission locked"
Hint	"Add tracking ID when your order ships"
Primary CTA	Go to My Orders
Secondary	Browse more deals

No back to Accept. White background, minimal text.

PAGE 6 — My Orders (list)

See [ORDERS-PAGES-REQUIREMENTS.md](#) — list section.

Must have: Search (order ID, tracking ID, model), store filter, sort (newest / oldest / needs action), Ongoing + Completed tabs with badge, pull refresh, empty → browse deals, general help entry.

Each card must have: Status in one sentence, product + store + earn amount, one action label/button when user must act, tap → Order detail.

PAGE 6b — Order detail (inside one order)

See [ORDERS-PAGES-REQUIREMENTS.md](#) — inside order section.

Must have:

- Header: back, order ref + copy, **report issue (this order)**, **cancel order** (while allowed)
- Product + earn amount
- Step timeline — one step open; minimal fields per step
- Tracking: paste ID → **auto-detect courier** + **change if wrong** + Save
- Delivery: last 4 + OTP only
- Waiting: no input until Mintzer unlocks invoice
- Invoice: upload when unlocked; re-upload if rejected with reason
- Payment: 48h countdown after invoice submit

Cancel flow: Confirm → pick **preset reason** (seller cancel, marketplace cancel, wrong card, price mismatch, OOS, wrong product, delivery issue, changed mind, other + 50 chars max) → order canceled for ops.

Report issue: Issue type list; auto-attach order id + step + deal — user does not retype.

PAGE 7 — Wallet

Purpose: Balance and history.

Layout:

#	Element
Header	“Wallet” · back if from Home
Hero card	Available balance ₹X,XXX large
Row	Pending · Confirmed (smaller)
List	Transactions — order credits, withdrawals
CTA	Withdraw (min balance + KYC verified)
Note	TDS deducted line

Empty: “Start earning” + link to Home.

v1: Full withdraw flow required (see PAGE 12).

PAGE 8 — Offers

Purpose: Promotions separate from deal list.

Layout:

Element	Content
Header	Offers
Cards	Signup bonus, referral, seasonal
Each card	Title · expiry · T&C · CTA

Light styling — don’t compete with Home deal cards.

PAGE 9 — Profile

Purpose: Account, KYC, support.

Layout (list rows):

Row	Content
Header	Phone number
KYC	Status badge — tap to complete
Wallet	Shortcut →

My Orders	Shortcut →
Support	WhatsApp / email
Tutorials	YouTube
Notifications	Toggle
Terms & Privacy	Links
Log out	Red text — confirm dialog

KYC sub-screen/sheet:

Field	Required
Name as per PAN	Yes
PAN number	Yes
Submit	Primary

Bank/UPI for withdraw collected on **Withdraw screen** (PAGE 12), not on KYC form.

PAGE 10 — KYC required (modal)

Purpose: Gate before first order (PerkPay-style timing).

Layout: Sheet or centered modal on Accept screen.

Element	Content
Icon	Shield
Title	Complete verification
Body	One-time before your first order
CTA	Complete KYC
Secondary	Cancel

Light theme — not dark/gold competitor modal.

PAGE 12 — Withdraw

Purpose: User moves wallet balance to bank/UPI (v1 full flow).

Entry: Wallet → **Withdraw**

#	Element
Header	Back · “Withdraw”
Summary	Available balance · Min withdrawal ₹250

Method	UPI / Bank account (tabs or radio)
UPI	UPI ID field
Bank	Account number · IFSC · Account holder name
Amount	Enter amount (max = available) · Quick chips 100% / 50%
Note	Processing time · TDS summary if applicable
CTA	Withdraw primary
Success	"Withdrawal submitted" + reference id

Requires: KYC verified (Name + PAN). Show blocker if not verified → Complete KYC.

States: Insufficient balance, below minimum, invalid UPI, loading, success, failed.

PAGE 13 — Language (Profile sub-screen)

Element	Content
Title	Language / भाषा
Options	English · हिंदी
Note	Applies immediately app-wide

PAGE 14 — Notification states (not full screens)

Design notification **banners** and **push** templates:

Type	Title example	Tap opens
Timer warning	5 minutes left to place order	Accept
Timer expired	Complete your deal — try again	Deal detail
Parcel received	Upload your invoice	My Orders order
Payment credited	₹600 added to wallet	Wallet

7. Money display rules

7.1 Deal detail — Money summary card (required)

Single white card, four sections:

YOU PAY

Line	Example
Order value	₹20,000

Platform fee	₹90 △
Card fee	₹110 △
Discount	– ₹0
Total checkout	₹20,200

CASHBACK (your card)

Line	Example
Cashback	₹1,000
Credited	Next billing cycle
Note	Cashback not on platform/card fees

FROM MINTZER (wallet)

Line	Example
Wallet credit	₹19,300

YOU EARN

Line	Example
Commission	₹300
TDS	– ₹0
Final earnings	₹300 ← hero green, largest

Expand: How wallet is calculated

Order – Cashback – Discount + Commission = Wallet

Footer note:

“Cashback is credited as per your bank’s billing cycle. Mintzer wallet after order completion.”

7.2 Accept screen — compact money

Two lines only:

- You pay **₹20,200**
- You earn **₹300**

7.3 Home deal card

- Order ~₹20,000
- **Earn ₹300** green — no full breakdown

7.4 Formulas (for designer reference labels)

Total checkout = Order value – Discount + Platform fee + Card fee
 Wallet from Mintzer = Order value – Cashback – Discount + Commission

You earn = Commission - TDS

8. Asset & logo guidelines

8.1 Mintzer brand

- **New logo coming** — client will supply updated brand files before final export.
- Design with **placeholder** horizontal logo in header; swap when assets arrive.
- Formats needed: SVG + PNG @1x/@2x/@3x, light background only.
- Primary blue #1A73E8 — not purple gradient logo treatments.

8.2 Store logos (Flipkart, Amazon, etc.)

- Master file: **80×80px @2x** canvas, transparent PNG
- In app: **40×40dp** box, **object-fit: contain**
- Never stretch width independently

8.3 Bank / card logos

- Master file: same padding standard as stores
- In app: **32×32dp** box, contain
- Layout: **[logo] Card to use · Axis Credit Card**

8.4 Product images

- Variable aspect — container **160×160dp** or 4:3, contain
- Placeholder if missing

8.5 Illustrations needed

Use	Style
Empty deals	Simple, light
Empty orders	Same family
Timer expired	Neutral, not scary
Success	Checkmark — minimal

9. Notifications & deep links

Design in-app notification center (bell) + push lock screen:

- Badge count on bell
 - List: title, time, read/unread
 - Tap → Accept / Deal detail / My Orders / Wallet
-

10. States checklist (all screens)

For each screen, designer delivers:

- ☐ Default
- ☐ Loading / skeleton

- ☐ Empty
- ☐ Error
- ☐ Disabled / blocked (where applicable)
- ☐ Success (where applicable)

Critical flows to prototype in Figma:

1. Accept timer running → submit success
2. Active placement blocks Home deals
3. My Orders step progression (6 steps)
4. Invoice locked vs unlocked
5. 48h payment countdown

11. Out of scope for v1 design

- Dark theme
- Live courier API auto-tracking (user selects partner + enters ID manually)
- Admin panel (separate product)
- iOS-specific variants (optional later)
- OCR auto-fill from screenshot
- Instant orders tab
- Tamil / other languages (after Hindi)
- Referral deep gamification

12. Client decisions (locked)

#	Decision
1	Logo: New brand — client will update; use placeholder until files delivered
2	KYC fields: Name + PAN only
3	KYC timing: On first Accept (before first order)
4	Orders v1: Regular only — no Instant tab
5	Home header: WhatsApp + YouTube icons — yes (support + tutorials)
6	Commission bar: Blue #1A73E8 — matches Google Material; white text; clearer than orange for v1 rebrand
7	Withdraw: Full flow in v1 (UPI + bank)
8	Signup / promo banner: Flexible copy — designer can use placeholder
9	Languages: English + Hindi in v1
10	Delivery partner: Dropdown required on tracking step; courier list from client samples; auto-detect from tracking ID is a later enhancement

13. Localization (English + Hindi)

Design deliverables:

- All user-facing strings in a **Google Sheet or Figma table**: key · English · Hindi.
- Priority screens for Hindi review: Login, Home, Deal detail money card, Accept, My Orders steps, Wallet withdraw.
- **Do not truncate** Hindi button labels — allow two lines on primary CTAs if needed.
- Icon-only where possible (copy, paste, wallet) to reduce translation load.

Sample:

Key	English	Hindi
accept_deal	Accept deal	डील स्वीकारें
you_earn	You earn	आपकी कमाई
withdraw	Withdraw	निकालें
delivery_partner	Delivery partner	डिलीवरी पार्टनर

Appendix A — Screen inventory

#	Screen	Artboard name
1	Login phone	01_Login_Phone
2	Login OTP	02_Login_OTP
3	Home	03_Home
4	Home blocked deal	03b_Home_Blocked
5	Deal detail	04_Deal_Detail
6	Accept	05_Accept
7	Accept expired	05b_Accept_Expired
8	Accept cancel dialog	05c_Cancel_Dialog
9	KYC modal	06_KYC_Modal
10	Order success	07_Order_Success
11	My Orders list	08_Orders_List
12	Order expanded — each step	08a-08f_Order_Steps
13	Wallet	09_Wallet
14	Offers	10_Offers
15	Profile	11_Profile
16	KYC form	12_KYC_Form
17	Withdraw	13_Withdraw

18	Withdraw success	13b_Withdraw_Success
19	Language	14_Language
20	Components page	00_Components
21	Design tokens page	00_Tokens
22	Hindi sample frames	00_Hindi_QA

Appendix B — Sample copy (deal detail money)

Rules bullets example:

- Any colour acceptable
- Apply coupon ₹500 at checkout
- Do not use regular SBI card — use SBI Cashback card only

Fee warning:

- Platform fee and card fee are not eligible for cashback.

End of design brief — Mintzer Technologies Pvt Ltd
